

Tailoring Training Center for Women Empowerment

Empowering Women Through Skills

We proudly introduce our new Tailoring Training Center, dedicated to empowering women by providing them with practical stitching and tailoring skills. This initiative will help women achieve financial independence and uplift their families and communities.

The training includes both traditional and modern tailoring techniques, machine operation, pattern cutting, and finishing. Our mission is to create an inclusive platform where women gain confidence, economic independence, and leadership through skill-based training.

Join us in this mission to stitch success and self-reliance into every woman's journey.
